

Acronym	Definition
FFPE	Formalin-fixed paraffin-embedded tissue (the preserved slice of tissue sample)
ctDNA	Circulating tumour DNA (cancer DNA in the blood)
NGS	Next-generation sequencing
EGFR, BRAF, MET, KRAS, ERBB2 and NTRK	Other somatic mutations found in lung cancer
qPCR and ddPCR	Quantitative PCR and droplet digital PCR. These are two types of PCR (polymerase chain reaction) techniques used to quantify DNA or RNA
BRAF codon 600	Part of the BRAF gene, another gene which can mutate to cause cancer
KRAS G12C	A specific mutation in the KRAS gene
